EXPERIENCE

Mappa — Co-Founder & CTO / hands-on engineer

Jan 2023 – May 2026

- Built the product from first commit to 100+ B2B customers across the Americas.
- Built event-driven backend and AI agent workflows with tool use, retries, evaluations, queues, streaming, and PostgreSQL.
- Led engineering while remaining the largest code contributor; customer outcomes: 300+ hours and \$30k+ saved per role.

Independent Engineer — Upwork

Jan 2017 – Apr 2023

- Built production web applications end-to-end across sectors, including healthcare administration systems used daily by clinical staff.

Earlier Experience — Woven, Dar Spa, HackerOne

2019 – 2023

- Woven: reviewed codebases and engineering exercises across seniority levels for US hiring pipelines.
- Dar Spa / HackerOne: built internal tooling; found and helped remediate multiple security vulnerabilities.

CAPABILITIES

ENGINEERING

Full-stack development, backend systems, product engineering, API design, event-driven architecture, security

LANGUAGES & DATA

TypeScript, Rust, Python, SQL, Bash, PostgreSQL

AI &

INFRASTRUCTURE

Production agent workflows: tool use, evaluations, retries, orchestration, operational safeguards, voice pipelines, LLM APIs; Temporal, queues, streaming, Cloudflare, Linux

OPEN SOURCE & EDUCATION

qstash-rs — Rust SDK for Upstash QStash

upwork-wlroots-bridge — Linux / Wayland integration

University of London — BSc Computer Science, 2022–2024
